“By raising aspirations and lowering the cultural barriers to getting into university I hope that over the next few years we will make a real difference to the profession. More importantly, we will gain some very bright and creative young people with new insights and experience of life.”

Prof. Alan Penn, Dean of the Bartlett Faculty of the Built Environment, UCL

“Architecture impacts our lives in more ways than we can imagine and we need young, creative-minded people, from all backgrounds, to help shape and build cities of tomorrow. Architecture should be accessible to everyone and that’s why Accelerate is so important. We are, as always, delighted to welcome this year’s mentees in to our home to help them develop their creative and critical thinking skills.”
