

Art & Design

Arranging Spaces

Let's Go

The size and shape of the rooms in our school building

The rooms in our school building	How big or small are these rooms?	What shape are the rooms?

Let's take a closer look

You are now going to create a design on paper for how an eco-school could look by using card to show how the space can be used

What do we need to think about when designing rooms and spaces?

Let's take a closer look

You are now going to create a design on paper for how an eco-school could look by using card to show how the space can be used

What do we need to think about when designing rooms and spaces?

Scale

The size and the shape of the rooms in relation to one another

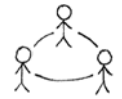

Connecting spaces

How each room will be accessed

Outside space

Which rooms should have windows to the outside and where the outside spaces should be

You will need:

- Black A4 card
- Pieces of different coloured card

The black card is your building site and the coloured card are your eco buildings

Cut out shapes to represent the rooms in your design and show how the rooms connect to each other

Let's share our findings

What have we learnt about architecture?

Let's fill in our learning brick
